

Database table `cat_tree`

Usage

The table `cat_tree` contains the [category](#) tree cache.

It is highly recommended that really nothing in this table has to be changed, because it is a cache for the category tree containing level information and is various times being regenerated.

Table structure

Field name	Field specification	Comment / Explanation
<code>idtree</code>	<code>int(11)</code>	Primary key (auto increment)
<code>idcat</code>	<code>int(11)</code>	Foreign key to table <code>cat</code>
<code>level</code>	<code>int(2)</code>	Level of category in tree

Generic DB information

ItemCollection	Item
<code>cApiCategoryTreeCollection</code>	<code>cApiCategoryTree</code>

Previous changes of this table

This table was not changed since the final release of CONTENIDO 4.9.
